

Abrasive Cloth Sanding Belts

High-performance abrasive cloth sanding belts are designed for efficient material removal and surface finishing. Constructed with durable abrasive grains bonded to a flexible cloth backing, these belts ensure long-lasting performance and resistance to wear.

Product Overview

High-Performance Abrasive Solutions

The AJ25 abrasive cloth sanding belt is engineered for versatility and durability, featuring premium Aluminum Oxide grains bonded with a robust resin-over-resin system. Its flexible JWT cloth backing includes an anti-slip treatment, ensuring stability and long-lasting performance during intensive grinding tasks. Designed to deliver a consistently fine surface finish, this abrasive is an ideal choice for professional-grade woodworking, metalworking, and furniture fabrication.

Technical Specifications

Abrasive Material	Aluminum Oxide
Bonding System	Resin over resin
Backing Material	JWT Cloth
Grit Range	P40 - P600

Product Features

Key Attributes	Flexible, High Wear Resistant, Anti-slip Backing
----------------	--

Applications

Suitable Materials

- Wood
- Metal
- Furniture
- Irregular Surfaces

Product Variations

Available Formats

Abrasive Belt • Narrow Belt • Sheet • Narrow Rolls
