

Abrasive Cut-Off Machine

The abrasive cut-off machine is a power tool designed for cutting metal, tile, and concrete. It features a high-speed abrasive disc that rapidly grinds through the material.

Product Overview

High-Performance Abrasive Cutting

This abrasive cut-off machine is a robust power tool engineered for precision cutting across a variety of demanding materials, including metal, tile, and concrete. Utilizing a high-speed abrasive disc, it delivers rapid and efficient material removal for construction, metalworking, and demolition tasks. Designed with operator safety and stability in mind, the unit features an integrated vise for secure workpiece clamping and a protective guard to manage debris.

Technical Specifications

Safety Features

- Integrated workpiece vise
- Protective debris guard

Primary Applications

Metalworking, Construction, Demolition, Tile Cutting

Cutting Mechanism

High-speed abrasive disc
