Overview

High-Performance Cut-Off Saw

This high-performance cut-off machine is designed for precise and efficient cutting of metal and other hard materials. It features a robust motor, an adjustable workpiece clamp, and a built-in spark guard to ensure safe and accurate operation. Ideal for industrial and construction applications, the machine includes a durable abrasive wheel and a sturdy base for maximum stability during use.

Key Features

Usability Features

- Ergonomic handle
- Quick-release vise
- Adjustable workpiece clamp
- Sturdy base for stability

Safety Features

Spark guard, Wheel guard, Lock-off switch
