

# Abrasive Cut-Off Wheel for Electric Tools

Abrasive cut-off wheel designed for use with electric tools. Engineered for high-speed cutting applications with a maximum operating speed of 80 m/s.

## Product Overview

### High-Performance Abrasive Cut-Off Wheel

This abrasive cut-off wheel is engineered for precision and efficiency when working with metal and other hard materials. Designed specifically for electric tools, it features a durable bond construction that ensures consistent material removal in demanding industrial and construction environments. With a maximum operating speed of 80 m/s, this wheel provides the reliability professionals need for high-speed cutting applications.

## Technical Specifications

### Maximum Operating Speed

**80 m/s**

Max Speed

<b>Primary Applications</b>	Metal Cutting, Hard Materials, Industrial Use, Construction
<b>Compatible Tools</b>	Electric Tools
