Abrasive Cut-Off Wheel for Metal and Steel

This abrasive cut-off wheel is designed for use with electric tools. It is suitable for cutting various materials including metal, steel, and alloys.

Product Overview

High-Performance Abrasive Cutting Solution

This abrasive cut-off wheel is engineered for precision and efficiency when working with metal, steel, and various alloys. Constructed with a specialized blend of abrasive grains and bonding agents, it ensures long-lasting durability even in demanding industrial and construction environments. Designed for use with electric tools, it balances high-speed performance with operator safety compliance.

Technical Specifications

Performance Metrics

63 m/s	30 P
Maximum Operating Speed	Hardness Grade

Material Specification Code	WA-36
Model Designation	41WA30P8BF
Abrasive Grain Type	White Aluminum Oxide (WA)

Application & Compatibility

Target Materials	Metal, Steel, Alloys
Compatible Equipment	Electric power tools

Quality & Safety

Safety Standards

Safety Compliant • Industrial Grade • Operator Protected

Key Advantages

- Efficient and precise cutting performance
- Engineered for durability and long-lasting use
- Suitable for demanding industrial applications
- Optimized bonding agent for grain retention
