

Abrasive Cut-Off Wheel for Metal Cutting

This abrasive cut-off wheel is designed for industrial cutting applications. Engineered with a reinforced resin bond for durability and high-speed performance.

Product Overview

High-Performance Industrial Cutting Solution

This abrasive cut-off wheel is engineered for demanding industrial cutting applications, offering high-speed performance and exceptional durability. Featuring a reinforced resin bond, it is designed to handle various metals and alloys with precision and safety. The wheel is built to comply with international safety standards, ensuring reliable operation in professional environments.

Technical Specifications

Maximum Operating Speed

80 m/s
Max Speed

Model Specification

42A36R8BF

Material & Construction

Bonding Material

Reinforced resin bond

Compatible Materials

Metal, Alloys, Industrial Steel

Safety & Compliance

Compliance

Safety Standard Compliant • Industrial Grade

Safety Features

- Reinforced construction for high-speed stability
- Compliant with abrasive wheel safety regulations
- Engineered for burst resistance at rated speeds
