

# Abrasive Cutting and Grinding Wheel

This abrasive wheel is designed for cutting and grinding metal. It is made with reinforced fiberglass for enhanced safety and can operate at a maximum speed of 80m/s.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Abrasive Solutions

These abrasive cutting and grinding wheels are engineered for professional metalworking, offering a versatile range of sizes from 4" to 16". Built with high-quality abrasive grains and active fillers, they provide efficient material removal and an extended service life. The reinforced construction ensures maximum safety and shock resistance for demanding industrial applications.

## Key Performance Metrics

### Performance Highlights

**80 m/s**

Max Operating Speed

**6640 RPM**

Maximum Rotation

## Safety & Standards

Compliance with EN 12413 and MPA certification ensures operator safety.

## Compliance & Certification

EN 12413 • MPA Certified

### Required Safety Gear

- Dust respirator
- Protective gloves
- Ear protectors
- Safety goggles

## Technical Specifications

### Abrasive Material Options

A (Aluminium Oxide), WA (White Aluminium Oxide), C (Black Silicon Carbide), GC (Green Silicon Carbide), ZA (Zirconium Corundum)
