Product Overview

High-Performance Abrasive Wheels

These abrasive cutting and grinding wheels are engineered for demanding steel and metal applications. Designed for professional use, they offer consistent performance and reliable material removal. Each wheel is manufactured under strict quality management systems to ensure durability and operational safety during cutting, grinding, and shaping tasks.

Technical Specifications

Operating Speed Range

4500 RPM
Minimum RPM

8500 RPM
Maximum RPM

80 m/s
Min Speed

90 m/s
Max Speed

Compliance & Standards

ISO 9001 • UKAS

Available Diameters

4-inch, 7-inch

Usage Information

Primary Applications

- Steel cutting
- Metal grinding
- Metal shaping
- General industrial metalwork

Operational Safety

Wheels must be mounted correctly before use. Never exceed the maximum operating speed (RPM/m/s) indicated on the product. Always wear appropriate personal protective equipment during operation.
