

Abrasive Cutting Disc for Electric Tools

This abrasive cutting disc is designed for use with electric tools. It is engineered for cutting various materials and is suitable for applications requiring precision cutting and material removal.

Product Overview

High-Performance Abrasive Cutting Disc

This abrasive cutting disc is engineered for precision cutting and material removal when used with electric power tools. Constructed with high-quality abrasive grains and a durable bonding agent, it ensures efficient performance across various cutting applications. Designed for safety and reliability, this disc is an essential component for professional workshops and industrial tasks requiring clean, consistent cuts.

Technical Specifications

Maximum Operating Speed

72 m/s

Max Speed

Disc Specifications

Attribute	Value
Model Designation	41
Grain/Bond Code	A40P
Bonding Type	8BF

Safety & Usage

Safety Requirements

- Use appropriate personal protective equipment (PPE)
- Ensure compatibility with electric power tools
- Verify maximum speed ratings before operation

Primary Applications

Precision Cutting, Material Removal
