

Abrasive Cutting Disc for Industrial Use

This abrasive cutting disc is designed for industrial applications requiring high-speed cutting. Its reinforced construction ensures durability and safety when used on various materials with machinery and related equipment.

Product Overview

High-Performance Industrial Cutting Disc

This abrasive cutting disc is engineered for demanding industrial applications, offering a reinforced construction for enhanced safety and durability. Designed to deliver precise and efficient cutting performance, it is suitable for a variety of materials in machinery and industrial settings. Its robust build ensures reliable operation at high speeds, making it an essential tool for professional metalworking and maintenance tasks.

Key Performance Metrics

Performance Highlights

80 m/s

Maximum Speed

300 mm

Outer Diameter

3.2 mm

Thickness

Technical Specifications

Dimensions

Measurement System	Diameter	Thickness	Bore Size
Metric	300mm	3.2mm	25.4mm
Imperial	12"	1/8"	1"

Model Reference

TED00001 / 42WA

Safety & Standards

Certifications & Standards

EN12413 • MPA Z-07004 • REINFORCED

Application Details

Usage Features

- Industrial-grade abrasive cutting
- High-speed operation (Max 80m/s)
- Compatible with compressors and industrial machinery
- Reinforced construction for safety
- Precise and efficient material removal

Suitable Materials

Industrial Metals, Machinery Components, General Industrial Materials
