

Abrasive Cutting Disc for Metal

Abrasive cutting disc designed for industrial cutting applications. Constructed with high-quality abrasive grains and a durable bonding matrix for efficient material removal and long service life.

Product Overview

Industrial-Grade Cutting Performance

This abrasive cutting disc is engineered for demanding industrial cutting applications involving various metals and alloys. It features high-quality abrasive grains combined with a durable bonding matrix, ensuring efficient material removal and an extended service life. Designed for high-speed operation, this disc meets essential safety standards to provide reliable performance in professional workshop environments.

Technical Specifications

Safety Compliance

High-Speed Rated

Key Features

- High-quality abrasive grains
- Durable bonding matrix
- Designed for industrial use
- Optimized for longevity

Suitable Materials

Metal, Alloys
