

Abrasive Cutting Wheel

Abrasive cutting disc designed for use with electric tools. It is constructed with a blend of abrasive grains and bonding materials for efficient material removal.

Overview

High-Performance Abrasive Cutting Disc

This abrasive cutting wheel is engineered for precision and efficiency when used with high-speed electric tools. Constructed from a specialized blend of abrasive grains and bonding materials, it ensures rapid material removal across various metals and alloys. The reinforced center provides exceptional stability and durability, making it a reliable choice for demanding industrial cutting tasks.

Technical Specifications

Metric Dimensions

115 mm
Diameter

1.2 mm
Thickness

22.2 mm
Bore Size

Imperial Dimensions

4 1/2" x 3/64" x 7/8"

Performance Limits

Maximum Rotational Speed: 12250 RPM

Maximum Linear Speed: 80 m/s

Material & Construction

Composition

- Abrasive grains
- Bonding materials
- Reinforced center

Industry Code

A 60 SBF

Applications

Suitable Materials: Metals, Alloys

Tool Compatibility: Electric power tools / Angle grinders

Compliance & Safety

Safety & Quality

High-Speed Operation Compliant • Reinforced Stability • Precision Engineered
