

Abrasive Cutting Wheel, 72 m/s

Abrasive cutting wheel designed for use with electric tools and accessories. It is constructed with 41A30Q8BF abrasive grain for efficient material removal and operates at a maximum speed of 72m/s.

Product Overview

High-Performance Abrasive Cutting Wheel

This professional-grade abrasive cutting wheel is engineered for demanding industrial applications requiring efficient material removal. Built with high-quality abrasive grain, it delivers consistent performance and durability during intensive cutting tasks. Designed for compatibility with standard electric power tools, this wheel ensures reliability and precision in professional environments.
