

Abrasive Cutting Wheel for Electric Tools

Abrasive cutting wheel designed for use with electric tools. Constructed from high-quality abrasive grains bonded for optimal cutting performance.

Product Overview

Professional Abrasive Cutting Wheel

This high-performance abrasive cutting wheel is engineered specifically for electric tools, delivering clean and efficient cuts across a variety of materials. Constructed with premium abrasive grains and a reinforced center, it ensures exceptional durability and stability during demanding operations. Designed with safety and precision in mind, this wheel minimizes vibration to provide a reliable solution for professional cutting tasks.

Technical Specifications

Max Operating Speed

72 m/s

Maximum Speed

Model Code

41A30Q8BF

Features & Compliance

Key Design Features

- Reinforced center for added stability
- Reduced vibration design
- High-quality abrasive grain construction

Safety Compliance

Safety Standard Compliant
