Product Overview

High-Performance Fiber Discs

These high-performance fiber discs are engineered for demanding grinding, blending, and finishing applications. Constructed with a durable fiber backing and premium abrasive grains, they provide an excellent cut rate, extended service life, and consistent performance across various surfaces. They are versatile solutions suitable for use on metal, wood, and composite materials.

Technical Specifications

Certifications

ISO 9001:2008

Abrasive Material

Silicon Carbide

Coating Type

Closed Coat

Available Grit Sizes

AA-16, AA-120

Safety & Usage

Safety Requirements

- Wear eye protection
- Wear face protection
- Wear body protection
