

# Abrasive Flap Disc

This abrasive flap disc is designed for efficient grinding, blending, and finishing. Its overlapping flaps provide a consistent cut rate and extended product life.

## ADDITIONAL IMAGES

## Product Overview

### Professional Abrasive Flap Disc

This professional-grade flap disc is engineered for heavy-duty metalworking, including grinding, blending, and finishing tasks. Featuring high-quality aluminum oxide abrasive, it delivers efficient material removal and an extended service life for consistent performance. The overlapping flap design ensures a steady cut rate, making it an ideal choice for weld removal, deburring, and surface preparation on steel, stainless steel, and aluminum.

## Technical Specifications

### Max Operating Speed

**13300 RPM**

Max RPM

**80 m/s**

Max Speed

### Available Diameters

- 100
- 125
- 150
- 180

### Available Grit Sizes

40, 60, 80, 120

### Flap Count

72

## Compliance & Quality

### Certifications

EN13743 • ISO 9001 • TUV • MPA

### Abrasive Material

Aluminum Oxide
