Product Overview

High-Performance Abrasive Flap Disc

This abrasive flap grinding disc is engineered for efficient material removal and consistent surface finishing. Featuring a robust fiber support backing, it allows operators to apply increased pressure during demanding tasks. The overlapping abrasive flaps ensure a long service life, making it a reliable choice for weld blending, deburring, and general surface preparation across various materials.

Technical Specifications

Compatible Materials

- Metal
- Wood

Backing Material

Fiber support

Primary Applications

Weld Blending, Deburring, Surface Preparation, Material Removal

Design Features

Design Highlights

Overlapping Flaps • Central Mounting Hub • Durable Abrasive Grains
