

Abrasive Flap Wheel for Metal Finishing

This flap wheel is an abrasive tool for grinding, blending, and finishing metal surfaces. It features multiple abrasive flaps arranged around a central hub.

Product Overview

Professional Metal Finishing Tool

The Abrasive Flap Wheel is a versatile tool engineered for precision grinding, blending, and finishing of metal surfaces. Featuring a radial arrangement of abrasive flaps around a central hub, it provides consistent material removal and smooth surface conditioning. Ideal for use with angle grinders, drills, and die grinders, this tool is essential for smoothing rough edges and achieving a high-quality polished finish.

Technical Specifications

Compatible Power Tools

- Angle Grinders
- Drills
- Die Grinders

Primary Applications

Grinding • Blending • Finishing • Deburring

Abrasive Materials

Aluminum Oxide, Zirconia Alumina
