Product Overview

Professional Abrasive Flap Wheel

This abrasive flap wheel is engineered for efficient dry grinding operations on a wide range of surfaces. Constructed with high-quality aluminium oxide, it provides consistent material removal and durability. It is an ideal solution for processing steel, non-ferrous metals, plastics, and various medium-density materials in professional workshops.

Technical Specifications

Dimensions

140 mm
Diameter

25 mm
Width

Maximum Operating Speed	5500 RPM
Abrasive Material	Aluminium Oxide
Grit Size	P60

Usage & Compatibility

Suitable Materials	Steel, Non-ferrous metals, Plastics, Medium-density materials
Application	Dry grinding
Mounting	Bore mount

Logistics

Country of Origin	China
