

Abrasive Grinding Disc

This abrasive disc is designed for grinding and finishing applications. It features a durable abrasive material bonded to a rigid backing for efficient material removal and long service life.

Product Overview

High-Performance Grinding Solution

This high-performance abrasive disc is engineered for demanding grinding and finishing applications across diverse materials. Featuring a durable abrasive material bonded to a rigid backing, it ensures efficient material removal and an extended service life. The design includes strategically placed cutouts that facilitate cooling and reduce loading, delivering consistent performance and a smooth, controlled user experience.

Technical Specifications

Design Features

- Cooling cutouts
- Anti-loading design
- Balanced construction
- Rigid backing

Compatible Materials

Metal, Stone, Concrete

Performance

Vibration Control

Minimal Vibration

Key Benefits

- Efficient material removal
- Long service life
- Consistent performance
- Smooth grinding experience
