

# Abrasive Grinding Wheel Set

This set of abrasive grinding wheels is designed for material removal and finishing. It includes wheels with different abrasive materials and grit sizes, suitable for use with rotary tools and grinders.

## Product Overview

### Versatile Abrasive Grinding Solution

This abrasive grinding wheel set is engineered for comprehensive material removal and precision finishing tasks. Designed for compatibility with rotary tools and standard grinders, the set features a variety of abrasive materials and grit sizes to accommodate diverse project requirements. These wheels are ideal for shaping, smoothing, and polishing surfaces across metal, wood, and plastic applications.

## Technical Specifications

### Primary Applications

- Material removal
- Surface finishing
- Shaping
- Smoothing
- Polishing

### Design Features

Color-coded for grit identification • Cylindrical geometry • Rotary tool compatible

### Compatible Materials

Metal, Wood, Plastic

### Mounting Type

Central bore arbor mount
