

Abrasive Nonwoven Fabric for Surface Polishing

This abrasive nonwoven fabric is designed for grinding metal and paint surfaces. Its high-strength nylon cloth construction is particularly suitable for body polishing applications.

Product Overview

Professional Surface Polishing Solution

This abrasive nonwoven fabric is engineered for high-performance surface preparation and finishing tasks. Crafted from high-strength nylon cloth, it offers a soft, conformable texture that resists clogging during use. It is an ideal general-purpose solution for grinding metal surfaces and automotive paint, ensuring a consistent finish for professional body polish applications.

Technical Specifications

Material Composition	Abrasive and high-strength nylon cloth
Key Features	Non-plugging, Soft texture, General-purpose, High-strength
Available Sizes	Customizable based on customer requirements

Applications

Recommended Applications

- Metal surface grinding
- Paint surface grinding
- Automotive body polish
