

Abrasive Roll for Metal and Wood Polishing

This abrasive roll is designed for use on various materials including metal and wood. It is suitable for both machine and hand applications, and available in multiple grains and grit options.

Product Overview

Versatile Abrasive Solution

The GXK51 abrasive roll is a highly adaptable solution designed for both professional machinery and manual hand-sanding applications. It supports a wide array of materials, ranging from various metals to wood, textiles, glass, and leather. Engineered with diverse grain and backing options, it provides reliable performance across industrial and artisanal tasks.

Technical Specifications

Standard Width	1420 mm
Available Abrasive Grains	Aluminum Oxide, Silicon Carbide, Zirconia Aluminum, Calcined A/O
Backing Types	Cotton Cloth, Blending Cloth, Polyester, Paper Backing

Application Areas

Metal Compatibility

Usual Metal • Ferrous Metal • Hard Metal

Wood Compatibility

Hard Wood • General Wood • HDF • MDF

Other Suitable Materials

Textile • Glass • Plaster • Leather

Usage & Performance

Operation Modes

- Machinery Use
- Hand Use
- Narrow Belts
- Flapwheel
- Disc
- Velcro Disc
- Self-adhesive Disc

Key Features

- Stiff Backing Cloth
- Wet/Dry Application
- Waterproof
