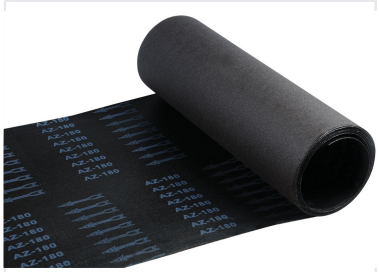
Abrasive Sandpaper Roll for Surface Preparation

This abrasive sandpaper roll is designed for sanding wood, metal, and other materials. It features a medium grit, making it suitable for general surface preparation.



Product Overview

Professional Abrasive Sandpaper Roll

This high-quality abrasive sandpaper roll is designed for professional surface preparation across wood, metal, and various other industrial materials. Its durable, tear-resistant backing ensures reliable performance even during intensive sanding tasks. The evenly distributed abrasive grit guarantees consistent results and a smooth finish every time, while the roll format provides maximum versatility by allowing operators to cut sheets to any required size.

Technical Specifications

Grit Rating	180 grit
Grit Type	AZ-180, Z-180
Model Identifier	TR332

Usage Characteristics

Suitable Materials

- Wood
- Metal
- General Surface Preparation

Features

Tear-resistant backing • Even grit distribution • Customizable sheet sizing
