

Abrasive Sandpaper Sheets Rolls and Mesh

This assortment includes abrasive cloth and paper with aluminum oxide and silicon carbide options. It is available in various grits and sizes for sheets, rolls, and stripes; sand mesh is also available.

Product Overview

Versatile Abrasive Solutions

This comprehensive range of abrasive sheets, rolls, and mesh is engineered for professional surface preparation across various materials. Options include high-performance Aluminium Oxide and Silicon Carbide abrasives, available in multiple backing materials like 100% Cotton and Polyester/Cotton blends to ensure durability. Designed for diverse applications, these products are perfect for sanding plasters, floors, walls, and grinding high-strength metals.

Material Composition

Backing Materials

- 100% Cotton
- 65% Polyester and 35% Cotton
- Heavy-duty fiber mesh

Abrasive Materials

Brown Aluminium Oxide, White Aluminium Oxide, Silicon Carbide

Technical Specifications

Abrasive Material Performance

Abrasive	Characteristics	Suggested Usage
Brown Aluminium Oxide	Greater hardness, higher toughness	Grinding high-strength metals such as carbon steel annealed

Sand Mesh Benefits

Open mesh structure • Anti-clogging • Double-sided coating • Tear resistant

Form Factors

Product Formats

- Sheets
- Rolls
- Stripes
- Discs

Available Dimensions

- 230x280mm
- 115mm x 2.5m
- 115mm x 5m
- 115mm x 50m
- 115mm x 100m
- 93x230mm
- 115x280mm
