

Abrasive Spot Blaster with Media Bottles

This abrasive spot blaster is designed for localized abrasive blasting applications. It features an attached media reservoir and includes additional media bottles for extended use.

Product Overview

Efficient Spot Blasting Solution

This lightweight abrasive spot blaster is engineered for precise, localized surface preparation. It is an ideal tool for quickly removing rust spots and chipped paint from metal surfaces, making it essential for maintenance and restoration tasks. The design features a top-mounted 510ml hopper and a durable reinforced plastic gun body, ensuring both ease of use and long-term reliability.

Performance Specifications

Max Working Pressure	90 psi
Average Air Consumption	6 cfm
Air Inlet Size	1/4 inch

Design & Capacity

Included Media

- 2 bottles of blast media
- 1kg per bottle

Hopper Capacity	510 ml
Construction Materials	Zinc plated nozzle, Reinforced plastic gun body, ABS hopper

Key Features

Primary Applications

Rust removal • Paint removal • Surface preparation
