# ABS Plastic Electrical Junction Box

ABS plastic enclosure junction box designed for electrical applications. This enclosure provides protection and organization for electrical components, ensuring safety and reliability.

## Product Overview

### High-Strength Electrical Junction Box

This ABS plastic junction box is engineered for reliable electrical component protection in both indoor and outdoor environments. Featuring an IP56 rating, it ensures robust defense against environmental factors while maintaining high structural integrity. The design includes a press-fit cover and integrated cable sleeves, making it a versatile solution for secure electrical organization.

## Technical Specifications

**Ingress Protection (IP) Rating**

IP56

**Key Design Features**

- High-strength construction
- Waterproof design
- Press-fit cover
- Integrated cable sleeves
