

ABS Wheel Speed Sensor for European Vehicles

This ABS wheel speed sensor is designed for a wide range of vehicles in the European market. It provides accurate wheel speed detection and is certified to ISO 14001 and TS 16949 quality standards.

Product Overview

Precision ABS Wheel Speed Sensor

This ABS wheel speed sensor is engineered to meet strict original equipment (OE) specifications, ensuring seamless integration and reliable performance. Utilizing high-quality hall effect chips, the sensor accurately monitors wheel rotation speed and transmits critical data to the anti-lock braking system computer. This precise communication is essential for preventing wheel lock-up during braking, significantly enhancing vehicle safety and stability.

Technical Specifications

Sensor Technology	Hall Effect Sensor
Vehicle Compatibility	European Vehicles

Certifications & Standards

Quality Assurance	OE Specification • Reliability Tested
Compliance Standards	ISO 14001, TS 16949, TÜV Certified
