

# AC 220V Indicator Light with Integrated Buzzer

This AD56-16 series indicator light combines visual and audible alerts with its integrated  $\text{Æ}16$  buzzer. Operating on AC 220V, it features a compact design for straightforward installation in industrial control panels and various equipment.

## Product Overview

### AD56-16 Series Indicator Light with Buzzer

The AD56-16 series indicator light with an integrated  $\text{Æ}16$  buzzer is designed to provide simultaneous visual and audible alerts. Operating on AC 220V, this compact unit is engineered for easy installation in industrial control panels, machinery, and various automation equipment. It serves as an essential component for systems requiring clear, reliable status indication and alarm signals.

## Technical Specifications

Rated Voltage	AC 220V
Mounting Hole Diameter	16 mm
Model Number	AD56-16SM

## Features

### Typical Applications

- Industrial Control Panels
- Machinery
- Automation Equipment

Functionality	Visual Indicator, Audible Alarm, Integrated Buzzer
