

AC 230V 30W Kitchen Appliance Fan Motor

This fan motor is designed for use in kitchen appliances such as ovens and microwave ovens. It operates at AC 230V 50/60Hz with a power consumption of 30W.

Overview

High-Performance Kitchen Appliance Motor

This robust AC fan motor is engineered for reliable operation in demanding kitchen environments, such as ovens or range hoods. Designed for 230V systems, it delivers consistent airflow with low noise levels and efficient power consumption. Its durable construction, featuring a metal fan assembly and stable mounting bracket, ensures long-term performance and heat dissipation.

Electrical Specifications

Rated Voltage	230 V
Frequency	50 / 60 Hz
Starting Voltage	175 V

Performance Metrics

Performance Overview

30 W Rated Power	1200 rpm Speed	40 dB Noise Level
Rated Current	280 mA	

Technical Details

Rotation Direction	Clockwise (CW)
Electrode Strength	1500V/1min or 1800V/1s
Max Leakage	2 mA
