

# AC Arc Welder

This AC arc welder is a robust and reliable welding machine suitable for various arc welding applications. It delivers stable and consistent arc welding performance and is portable for workshop and on-site use.

## Product Overview

### Robust AC Arc Welding Performance

The BX1-SERY AC Arc Welder is a reliable and durable solution engineered for versatile welding applications. Built with a sturdy design featuring a high-visibility color scheme, this machine ensures consistent and stable arc performance. Equipped with intuitive controls and integrated wheels for enhanced mobility, it is an ideal choice for both workshop environments and on-site projects.

## Technical Specifications

Model Number	BX1-300
Welding Type	AC Arc Welding

## Design & Build

### Control Interface

- Large adjustment wheel for current control
- Clearly labeled output terminals
- Prominent on/off switch

### Build Quality

Robust Construction • Durable

Portability Features	Integrated Wheels, Portable Design
