

# A.C. Arc Welder 80-400A

This A.C. arc welder is designed for a variety of welding applications. It includes a power switch and an amperage adjustment dial that ranges from 80 to 400 amps for precise control.

## Product Overview

### Professional A.C. Arc Welder

The BX1-400 is a robust and reliable A.C. arc welding machine engineered for high-performance industrial applications. It features a wide adjustable amperage range of 80 to 400 amps, allowing for precise control and versatility across various welding tasks. Designed for durability and consistent output, this unit serves as a dependable power source for professional welding operations.

## Technical Specifications

### Amperage Range

**80 A**

Minimum Current

**400 A**

Maximum Current

<b>Model Series</b>	BX1-400
<b>Welding Type</b>	A.C. Arc

## Operational Controls

### Control Features

- Manual amperage adjustment dial
- Integrated power source switch (On/Off)
