

AC Arc Welder BX1-500

This AC arc welder is designed for industrial use. It features a power source selector, variable amperage control from 100 to 500 amps, and a wheel-mounted chassis.

Product Overview

Industrial AC Arc Welder

This robust AC arc welder is specifically engineered for demanding industrial welding environments. It offers a wide amperage range of 100 to 500 amps, allowing for versatility across a variety of heavy-duty welding tasks. With its integrated power source controls and durable, wheel-mounted chassis, this unit is designed to provide reliable performance combined with high mobility on the job site.

Technical Specifications

Amperage Output

100 A Minimum Current	500 A Maximum Current
---------------------------------	---------------------------------

Welding Type	AC Arc Welding
---------------------	----------------

Design and Mobility

Mobility	Wheel-mounted, Industrial Grade, Portable Chassis
-----------------	---

Control Interface

Control Options

- Power source selector
- Variable amperage control
- Visual current indicators (100-500A)
