

AC Arc Welding Machine

This AC arc welding machine is designed for heavy-duty industrial applications. It features a wide current range from 125 to 630 Amperes, suitable for various welding tasks.

Overview

Industrial A.C. Arc Welding Machine

The BX1-630 is a robust A.C. arc welding machine designed for heavy-duty industrial applications. With a versatile current range spanning from 125 to 630 Amperes, it is engineered to handle a wide variety of professional welding tasks. The unit features a manual handwheel for precise current adjustment and is built with a durable, wheeled chassis to ensure both reliability and portability in demanding work environments.

Performance Specifications

Current Range

125 A Minimum Current	630 A Maximum Current
---------------------------------	---------------------------------

Model Identification

BX1-630

Technical Features

Control Features

- Manual handwheel for current adjustment
- Clear, easy-to-read control panel
- Integrated Power Source
- Simple On/Off switch interface

Design Highlights

Heavy-Duty, Industrial Grade, Portable, Wheeled Chassis
