

AC Ball Bearing Cooling Fan

This AC fan is designed for cooling electronic components and systems. It features a ball bearing construction for enhanced durability and longevity.

Overview

High-Performance Cooling Solution

This AC ball bearing cooling fan is engineered for reliable heat dissipation in electronic components and industrial systems. Featuring a durable ball bearing construction, it ensures extended service life and consistent performance. The unit is impedance protected for enhanced safety, making it a dependable choice for demanding cooling applications.

Technical Specifications

Dimensions	150mm x 150mm x 50mm
Operating Voltage	220-240V
Frequency	50/60Hz

Performance Metrics

Electrical Performance

35 W

Power Consumption

0.29 A

Rated Current

Features

Safety & Certifications	Impedance Protected, Ball Bearing, CE
