

# AC Cooling Fan for Electronics

This AC fan is designed for efficient cooling in electronic applications. The fan features a durable construction and optimized blade design to maximize airflow while minimizing noise.

## Overview

### High-Performance Thermal Management

This AC cooling fan is engineered for efficient thermal management in demanding electronic environments, including power supplies and server systems. Featuring a robust construction and an optimized blade design, it delivers maximum airflow while maintaining minimal noise levels. The unit is designed for reliability and longevity, ensuring consistent performance for critical electronic equipment.

## Technical Specifications

|               |                   |
|---------------|-------------------|
| Dimensions    | 200 x 200 x 60 mm |
| Rated Voltage | AC 220-240V       |
| Frequency     | 50/60 Hz          |

## Performance Metrics

### Key Performance Metrics

|                               |                                  |
|-------------------------------|----------------------------------|
| <b>0.3 A</b><br>Rated Current | <b>54 W</b><br>Power Consumption |
|-------------------------------|----------------------------------|

## Safety & Compliance
