

AC Current Transformer 1.5(6)A

This current transformer is designed for measuring AC currents. It features a rated current of 1.5(6)A, burden resistance of 20 Ohms, and a current ratio of 5mA.

Overview

Precision AC Current Measurement

This compact current transformer is engineered for accurate AC current monitoring and control applications. With a rated current of 1.5(6)A and a 0.05 accuracy class, it ensures reliable performance in demanding measurement environments. The unit features a robust black housing and is equipped with convenient wire leads and loop terminals to facilitate quick and secure installation.
