

# AC Electric Fan Motor 4W

This 220-240V AC electric fan motor is designed for use in household appliances such as electric fans. It operates at 4W and has a frequency of 50/60Hz.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency AC Fan Motor

This 4W AC electric fan motor is engineered for reliability in household appliances and ventilation equipment. Designed to operate within a 220-240V range at 50/60Hz, it offers versatile installation options with CW/CCW rotation capabilities. The unit is built for durability, ensuring consistent performance in demanding air circulation environments.

## Technical Specifications

### Power Rating

**4 W**

Rated Power

**220 V**

Voltage Min

**240 V**

Voltage Max

### Electrical Characteristics

Parameter	Value
Frequency	50/60 Hz
Capacitor Spec	2.5/3 VAC
Rotation	CW/CCW

### Certification & Model Codes

COC 060021-356, -25-4710, CYM-HC A

## Design & Customization

### Customization Capabilities

- Custom design available based on blade requirements
- Tailored to specific application needs
