Product Overview

Reliable AC Electrical Contactor

This CUL-certified definite purpose AC electrical contactor is engineered for demanding industrial environments and HVAC&R systems. Featuring robust construction, it is designed to handle high inrush currents while ensuring efficient and safe switching of electrical circuits. This device meets rigorous industry standards for performance and long-lasting operation in critical control applications.

Technical Specifications

Series	CJX2-0910
Certifications	CUL Certified
Quality Control	100% self-inspection and testing before packing
Primary Applications	HVAC&R, Motor Control, Power Switching

Ordering & Logistics

Delivery Time	20 days
Sample Availability	Yes
Payment Terms	30% deposit, balance against B/L copy
Customization Options	OEM, ODM, Logo Printing
Warranty Policy	Replacement provided for quality issues
