

AC Magnetic Contactor

This AC magnetic contactor is designed for use in circuits up to 660V AC. It is suitable for making and breaking connections, frequently starting, and controlling AC motors.

Product Overview

High-Performance AC Magnetic Contactor

This AC magnetic contactor is engineered for reliable performance in electrical circuits up to 660V AC. Designed for frequent starting and controlling of AC motors, it supports versatile configurations including star-delta starters and mechanical interlocking systems. Compliant with international standards, it ensures safety and efficiency for industrial power transmission and distribution applications.

Technical Specifications

Rated Current Options

- 12A
- 24A
- 36A
- 95A

Standards Compliance

IEC 60947-4-1 • GB/T 14048.4 • CE Certified

Key Performance Metrics

50 Hz

Frequency

3 P

Phase

Available Models

- 1210
- 1810
- CJX2s-65

Rated Voltage Options

110V, 220V, 380V, 660V
