

AC Motor Capacitor CBB65A

This AC motor capacitor is designed for various motor applications. It features robust construction and high dielectric strength for an extended service life.

Product Overview

High-Performance Motor Capacitor

The CBB65A AC motor capacitor is engineered for reliable, long-term operation in a wide array of motor-driven applications. Built with robust construction, it offers high dielectric strength to ensure extended service life and consistent performance. This component meets strict industry safety standards, making it a dependable choice for professional electrical maintenance and manufacturing needs.

Technical Specifications

Model Type	CBB65A
Series	CBB65
Certifications	Safety Compliant, Industry Standard

Key Features

Performance Metrics

1 High Dielectric Strength	1 High Reliability
