

AC Power and Signal Cable Assembly

Power and connection cable assembly for finance electronics equipment. It features a standard AC power plug on one end and various wire terminations with clear plastic connectors.

Product Overview

Professional Cable Assembly Solution

This AC power and signal cable assembly is engineered for reliable performance in business automation and finance electronics equipment. It features a robust design with a standard AC power plug on one end and precision-terminated wire connections on the other. With integrated multi-colored wiring and clear connector housings, this assembly ensures organized, secure internal power and signal distribution.

Technical Specifications

Primary Application

Finance Electronics • Business Automation • Internal Power Distribution
