

AC Power Contactor for HVAC Systems

This AC contactor is designed for air conditioning and ventilation equipment, ensuring reliable AC power switching. It is suitable for HVAC systems, refrigeration units, and other electrical control circuits, featuring robust construction to meet industry standards for performance and safety.

Product Overview

Reliable HVAC Power Switching

This high-performance AC power contactor is engineered specifically for demanding HVAC, refrigeration, and ventilation applications. Built with robust construction, it ensures reliable switching for electrical control circuits in various industrial and commercial environments. The unit is designed to meet rigorous industry standards for safety and operational efficiency.

Electrical Ratings

Coil Voltage	208-240V 50/60 Hz
Coil Consumption	2.5 VA

Performance Metrics

Performance Specifications

Voltage (V)	FLA (A)	LRA (A)	Resistive (A)	HP
120	25	125	50	3
208	20	100	40	5
277	18	90	35	5
480	14	70	25	5
600	11	55	20	5

Certifications

Compliance	CE, US Standard

Applications

Compatible Applications

- Air Conditioning Systems
- Ventilation Equipment
- Refrigeration Units
- Industrial Heating Circuits
