

# AC to DC Power Adapter

This power adapter converts AC power to a DC voltage. It is suitable for powering various electronic devices.

## ADDITIONAL IMAGES

## Overview

### Reliable AC to DC Power Solution

This high-performance AC to DC power adapter is designed specifically for information technology equipment, providing a stable 19V output. It features a universal input range of 100-240VAC, making it suitable for international use across various power grids. Housed in a durable black casing with a built-in LED indicator, it ensures safe and efficient power delivery for professional electronic applications.

## Performance Metrics

### Core Performance

**19 V**

Output Voltage

**3.5 A**

Output Current

**60 Hz**

Max Frequency

## Input Specifications

Input Voltage	100-240VAC
Input Frequency	50/60Hz
Input Current	1 A

## Output Specifications

Output Voltage	19 V
Output Current	3.5 A

## Physical Interface

DC Plug Size	2.5 x 5.5 x 14mm
Connector Type	DC Barrel Connector

## Compliance & Safety

### Certifications

CE

### Safety Features

- Information Technology Equipment compatible
- Shock hazard protection (Do not open)
- Integrated LED power indicator

Usage Environment	Indoor Use Only
