

AC Tubular Motor

This AC tubular motor is designed for automation applications. It features robust construction, precise control, and reliable operation.

Product Overview

High-Performance AC Tubular Motors

This series of AC tubular motors is engineered for versatile automation applications, offering robust construction and precise control. Designed for reliability, these motors are ideal for roller shutters, blinds, awnings, and projection screens. They feature integrated limit switches and thermal protection, ensuring long-term operational safety and ease of installation for both residential and commercial projects.

Technical Features

Key Features

- Integrated limit switches
- Thermal protection
- Easy installation
- Robust construction

Motor Type

AC Tubular

Applications

Suitable Applications

Roller Shutters, Blinds, Awnings, Projection Screens, Residential, Commercial
