Overview

Professional LED Downlight Solution

This 12W LED integrated downlight is engineered for durability and efficient illumination in commercial or residential ceiling installations. Constructed with a robust aluminum housing, it ensures superior heat dissipation for long-lasting performance. The unit is designed for direct AC220-240V input, making it a reliable and energy-efficient lighting choice.

Technical Specifications

Model Number	DP-QPT12L
Power Consumption	12 W
Input Voltage	AC220-240V
Available Color Temperatures	3000K, 4000K, 6500K
Housing Material	Aluminum

Logistics

Packaging Details	40 pieces per carton
