

AC/DC Arc Welding Machine

This AC/DC arc welding machine is designed for a variety of welding applications. It features adjustable settings and a robust construction, ensuring reliable performance in industrial settings.

Overview

Industrial Arc Welding Performance

The ZXE1-500 is a high-performance AC/DC arc welding machine engineered for demanding industrial environments. Designed for versatility and reliability, it features robust construction and precision-adjustable settings to ensure consistent weld quality across diverse applications. Its dual-mode functionality makes it an essential tool for professional fabrication and heavy-duty metal joining.

Technical Specifications

Model	ZXE1-500
Welding Type	AC, DC, Arc Welding
