

AC/DC TIG/MMA Welding Machine

This welding machine is designed for both TIG and MMA welding. It features adjustable parameters such as pulse frequency, pulse width, and AC frequency.

Overview

Professional TIG/MMA Welding Performance

This versatile AC/DC welding machine is engineered for high-precision TIG and MMA welding applications. It offers advanced control features including adjustable pulse frequency, pulse width, and AC frequency to ensure optimal weld quality on various materials. Designed for professional workflows, the unit includes 2T/4T operation modes and a built-in VRD function for safer MMA welding.

Technical Specifications

Control Parameters

- Pulse Frequency
- Pulse Width
- AC Frequency
- AC Balance

Supported Processes

AC TIG, DC TIG, MMA, Spot Welding

Performance Features

Operational Modes

2T/4T Operation • MMA with VRD • Spot Welding

Physical Attributes

Build Quality

- Digital control panel
- Integrated cooling ventilation
- Portable handle
- Front-mounted cable connectors
