

Acrylic Casting Chamber for Electronics Manufacturing

Acrylic casting chamber designed for electronics manufacturing. It features a silicone rubber gasket, spring clamps, filler plugs, inlet port, and faceplate.

Product Overview

Professional Casting Chamber

This acrylic casting chamber is engineered for precision manufacturing processes in the electrical and electronic product sector. It features a robust design with a high-quality silicone rubber gasket and secure spring clamps to ensure a reliable seal during operation. The system includes versatile filler plugs and a dedicated inlet port, making it an essential tool for consistent and efficient casting workflows.

Technical Features

Clamp Quantity Options

- 2
- 4

Included Filler Plugs

1 pcs

Large Plugs

2 pcs

Small Plugs

Sealing System

Silicone rubber gasket with spring clamps

Components

Standard Components

Acrylic Chamber, Silicone Gasket, Spring Clamps, Filler Plugs, Inlet Port, Faceplate

Application

Primary Application

Electronics Manufacturing • Electrical Product Assembly
