

# Acrylic Edge Router

This acrylic edge router is designed for shaping and finishing the edges of acrylic sheets. It features adjustable settings for routing depth and speed, and a dust collection system.

## Product Overview

### Professional Acrylic Edge-Routing Solution

The YG-R Acrylic Edge-Router is a specialized machine engineered for high-precision shaping and finishing of acrylic sheet edges. Built with a robust frame and a rigid routing head, it delivers consistent, professional-grade results across various thicknesses. The integrated dust collection system ensures a clean working environment, while intuitive controls and comprehensive safety features provide a reliable operation experience for workshop environments.

## Technical Features

### Adjustable Settings

- Routing depth
- Routing speed

### Dust Collection

Yes

## Safety & Design

### Safety Equipment

Emergency stop, Protective guards

### Design Footprint

Compact design suitable for limited workshop spaces
